

Thank you.

Your acceptance of our online disclaimer has been recorded and permit to access the Private Property portion of The Cream Track has been granted for the date and time specified online.

Please print and retain this page for presentation if requested on the day of your walk.
The Cream Track - Serenity Farm Private Property Bush Walking access permit and instructions

DISCLAIMER

I accept that the section of track I will be walking upon known as The Cream Track passes through a working farm that is situated on private property located at 2940 - 3000 Springbrook Road, SPRINGBROOK QLD 4213 and that in exchange for permission to enter therein for the purpose of timely transit, I agree to indemnify the owners of that property and its assigns from all claims associated with my brief occupation of that property in the full knowledge that dangers exist with respect to livestock, the operation of farm machinery, electric fencing, barbed wire fencing, terrain, flora and fauna.

I agree to waive my right to pursue legal and or material remedy for any personal loss, damage or injury which I may occasion enroute to my destination and that I will remain on track and within 10 meters of the property's fenced Northern boundary at all times. I understand that this permit is issued expressly for the time and date stated below.

Issuance of this permit is contingent upon my agreement to strictly adhere to the pathogen control protocols detailed below to ensure the biosecurity of our delicate environment.

Pathogens

Stop the spread of pathogens (disease producing organisms such as

[phytophthora \(PDF\)*](#)

[myrtle rust](#)

and amphibian chytrid fungus). Soil and detritus can contain pathogens such as fungal spores that are harmful to the forest and frogs.

I agree to...

Keep to designated roads and walking tracks at all times.

Start and finish my bush walk with clean footwear and camping gear by removing soil from footwear, camping spade or trowel and tent pegs before leaving an area and keep all gear as clean and free from soil as possible during the walk.

Clean and disinfect my footwear and camping equipment using a disinfectant either at home or before visiting the track. Use pathogen control stations located at track entrances to the track if available.
